- S.u.S.E Linux

Supported Operating Systems

- 64-bit OS support only
- Support for x86-based systems only

Red Hat Enterprise Linux (RHEL)

		HANA 1.0 SPS12
Supported DBMS Version		
Supported OS Version		
RHEL 7.0		Supported
RHEL 7.1		Supported

RHEL 7.2	Supported
RHEL 7.3	Supported
RHEL 7.4	Supported

SUSE Linux Enterprise Server (SLES)

Supported DBMS Version		HANA 1.0 SPS12
Supported OS Version		
SLES 12 SP3	Supported	

Delphix Engine Toolkit Compatibility

Delphix Engine Version	HANA_1.0 SPS 12
5.1.x	No
5.2.2.x	No
5.2.3.x	No
5.2.4.x	Yes
5.2.5.x	Yes

Unsupported HANA Versions and Features

- HANA 1.0 MDC configuration is not supported with this release.
- HANA 2.0 is not supported with this release.
- V2P is not supported with this release.
- If the logs creation process has been disabled explicitly then the replication will not work.
- XSEngine should not be installed on the HANA DB.
- HANA License should be installed on source and target boxes.
- Delphix Self-Service is not supported with 1.1.0 toolkit release.

Known Issues

Key	Summary	workaround/Comments
CTC HANA-413	Disabling and enabling the DSource will disconnect the VDB snapshots created from the DSource snapshots(after the DSource is enabled). So the VDB snapshots will not have the same data corresponding to the DSource snapshot from which they were provisioned.	None
