EBS Toolkit 2.0.0 Release Notes

New Features

EBS toolkit version 2.0.0 contains the following new features for EBS 12.1 release:

- Use an arbitrary Delphix OS user to connect to remote machines and sudo to an appropriate EBS user for privileged operations
- With the Delphix 5.3.1.0 release, EBS 12.1 customers have separated the authentication access from the authorization for privileged operations resulting in a secure approach, especially for privileged actions.

Toolkit Installation

Toolkits to support EBS virtualization are not automatically included in the Virtualization Engine deployment and are installed by Delphix Professional Services or Technical Support. A Support case can be opened requesting installation by following this link.
