EBS 12.1 Plugin 2.1.0 Release Notes

EBS Plugin version 2.1.0 introduces a new feature to change the Oracle EBS appsTier JAVA based forms interface color.

With the Delphix 5.3.5 release, Toolkits are now referred to as Plugins.

Plugin Installation

Plugins to support EBS virtualization are not automatically included in the Virtualization Engine deployment and are installed by Delphix Professional Services or Technical Support. A Support case can be opened requesting installation by following this [link](#).

Migration and Compatibility

Oracle SI dbTechStack and Database

EBS 12.1

- Oracle11gR2 v11.2.0.4
- Oracle12cR1 v12.1.0.2

Oracle does not yet support the multi-tenant option for E-Business Suites, so Delphix cannot support this either.

Oracle EBS appsTier

- Single-node appsTier
- Multi-node appsTier with shared APPL_TOP

The Delphix Engine does not provide support for provisioning a multi-node appsTier where the APPL_TOP is not shared between nodes.

Supported Operating Systems

- Linux – SLES 9, 10, 11; RHEL 5, 6, 7, OL 5, 6
- Solaris – SPARC 9, 10, 11
- Advanced Interactive eXecutive (AIX) – See the matrix at the bottom of [Oracle E-Business Suite Support Matrix](#)

Key points

- Plugin 2.1.0 supports IDEA-228: Change EBS UI Look and Feel on provision/refresh for virtualizing EBS appsTier only for 12.1 customers.
