# HANA 2.0 Plugin Version 3.4.9 Release Notes

## New Features

This is the release of the Deferred recovery plugin version 3.4.9.

- This plugin will be supported over HANA 2.0 MDC configuration.
- No formal requirement for a staging target
- Virtualization of individual tenant databases instead of the entire system
- Ability to mix and match virtualized tenants across any HANA system
- Source backup files can be ingested from a surrogate host which is different from the production source host - thereby minimizing impact to the production source host.

## Plugin Installation

Toolkit to support HANA virtualization are not automatically included in the Virtualization Engine deployment and are installed by Delphix Professional Services or Technical Support. A Support case can be opened requesting installation by following this [link](#).

## Migration and Compatibility

### Supported DBMS Versions

- HANA Express, Platform Edition 2.0 SP03
- HANA Express, Platform Edition 2.0 SP04

### Supported Operating Systems

- Red Hat Enterprise Linux (RHEL)
- S.u.S.E Linux

### Red Hat Enterprise Linux (RHEL)

Supported DBMS Version	HANA 2.0 SPS 03 (Platform Edition & Enterprise edition)	HANA 2.0 SPS 04 (Platform Edition & Enterprise edition)
Supported OS Version		
RHEL 7.3	Supported	Supported

RHEL 7.4	Supported	Supported
----------	-----------	-----------

## SUSE Linux

Supported DBMS Version	HANA 2.0 SPS 03 (Platform Edition & Enterprise edition)	HANA 2.0 SPS 04 (Platform Edition & Enterprise edition)
Supported OS Version		
SUSE 12 SP3	Supported	Supported

## Plugin/Delphix Engine Compatibility

Plugin should be installed on compatible Delphix Engines per the table below:

Delphix Engine	HANA 3.4.5	HANA 3.4.9
5.3.4.x	Yes	Yes
5.3.5.x	Yes	Yes
5.3.6.x	Yes	Yes

## Unsupported Versions and Features

- The HANA 2.0 Plugin does not support multiple HANA installations on the same host.
- Multiple duplicate services are not supported in this release.
- Point in Time recovery of the HANA database is not possible.
- HANA 1.0 MDC and SDC configurations are not supported.
- Parallel or concurrent VDB creation against a single target host is not supported.
- Third-party backup tools and Backint are not supported.
- Scale-out source and target environments are not supported.
- V2P is not supported with this release.
- Self-Service (Jetstream) is not supported with this release.

## Known Issues

The following issues are known to exist in this release:

Delphix Ticket Number	Summary	Workaround /Comments
-----------------------	---------	----------------------

CTCHANA-821	HANA SQL Port value should remain consistent for the life of VDB.	None.
DLPX-44359	Job cancellation may fail	None.
